## Nine Ships to Load

# Expect 1947 to Set New Churchill Mark

WINNIPEG, Aug. 8.—(CP)—Approximately 5,000,000 bushels of grain—a record—are likely to be moved for export through the port of Churchill this year, a Canadian Wheat Board spokesman said here last night.

ALTHOUGH this figure falls far short of the 10,000,000 bushels of the Hudson Bay Route Association and other supporters of the northern seaport hoped would be exported this year, it will represent an increase of 700,000 bushels over the record of 4,300,000 bushels shipped in 1938.

Two reasons why total exports are not expected to exceed the 5,000,000 mark were given by W. C. McNamara, assistant chief commissioner of the board.

(1) Tonnage space for grain in the average ship amounts to about 30,000 tons. Approximately nine ships are scheduled to dock at Churchill this summer, most of them making two trips. Their combined freight capacity will exceed 5,000,000 tons by only a small margin.

(2) The Saskatchewan area which supplies most of the grain destined for export through Churchill—in the Prince Albert-Melfort region—is finding crop prospects poor this year.

However, Mr. McNamara expressed confidence that the 5,000,000 figure will be met. With the 2,500,000-ton elevator at Churchill, the largest building at the port—now filled with grain—this summer will mean that enough grain will have to be shipped by train during the nine weeks re-

## Crisis Powers

(Continued from Page 1)

the crisis of the economic crisis on the dissolution of the masteries in Tudor times and the industrial revolution.

He bluntly declared that Britons must be prepared to put all their resources at the disposal of the community. The government sought to do this by the use of the "emergency" powers in an awkward situation in a crisis which had to be dealt with immediately by short-term measures.

The Conservative opposition leader had dismissed as "a false, false, false" the emphasis declared in an earlier speech by Herbert Morrison, government leader in the House, that the powers were "appropriate and necessary" to meet Britain's needs.

Amid cheers from opposition benches the country's wartime prime minister declared: "Not only governments have rights; ordinary British people have rights too. We are asked to give a blank cheque for totalitarian government."

CHURCHILL'S intervention, the speaker said, was a "very timely" one. He said that only a few hours before the debate, was the climax of the third consecutive sitting which the Commons had devoted to British food.

Churchill, angry and shouting, launched his bitter attack on the government. "We are not going to let the House be a telephone booth," he said.

At variance as to exactly what we will do to the powers when we get them, Morrison said.

He said that the members of the council in the cabinet, department by department, had to make a decision. "We are not going to let the House be a telephone booth," he said.

Orders made under the bill would be open to parliamentary challenge, Morrison added.

But Churchill hammered vigorously at the government in his speech moving rejection of the supplies and services bill embodying the requested powers.

"These powers are the negation of British freedom and way of living in time of peace," he declared.

The government proposals will mean the abrogation of Parliament and of all our long-cherished rights."

Contending that the plan announced by Attlee in the House on Wednesday was universally judged to be inadequate, the crisis Churchill asked: "Is the government going to try to make up for lack of deeds by boastful words?"

"Are they without a plan, trying to cover up their vacuity assuming totalitarian powers?"

"The government ministers would be the absolute masters of the country while Parliament is in session. It is scheduled to adjourn for the summer next week."

"This necessary to the life of the country?" he asked. "It is a state of alarm and discouragement and paralysis."

Churchill declared that Attlee's speech was "a disaster" which the prime minister utilized his own words to say that the program for Britain was "universally judged to be inadequate."

In a sharp personal attack on the prime minister, Churchill declared: "What would Dunkerque have been if the little boats were only going to take of men of the trade unions and it was said that we didn't care ainker's curse for the rest?"

THIS APPARENTLY was a reference to First Minister Emmanuel Shinwell's speech several weeks ago in which he was reported to have said "we do not give ainker's curse about non-labor people in Britain."

The minister who made those expressions, Churchill said, "still remains a member of the government in spite of his failure, and he is retained in his position by the play of outside forces."

He took the floor after Deputy Prime Minister Herbert Morrison said the power sought under Prime Minister Attlee's emergency program were "appropriate and necessary" and not "a deep dark plot to conduct a social revolution."

He gave notice last night that he intended to enter the fray himself and that his Conservative opposition would fight to beat down the government's request for what he called "unlimited and indefinite powers" for dealing with the current economic emergency.

ALMOST IMMEDIATELY, however, the big Labor majority rallied behind its leadership and in a test vote, taken on a routine adjournment motion, over-ruled the Attlee critics, 318 to 170.

Nevertheless, discontent was said to be brewing within the Labor party and morning newspapers said 100 Labor members, contend-

## Post Mortem Smeared

The moral status of the Republican Party of the United States will not be enhanced by the current spectacle at Washington in which vindictive Republican agents are reaching down into the grave of two-year-dead Franklin D. Roosevelt in an effort to discredit his memory.

Surely such deep and unrelenting rancor must be sickening to the frank and forgiving nature of the American people.

The occasion is the investigation of the Senate's war expenditures investigating committee into a charge that Colonel Robert Roosevelt, influenced by lavish entertainment money which are made to look like bribes, persuaded his distinguished father to award a \$22,000,000 contract for aircraft to a company headed by Howard Hughes, airplane builder, and motion picture producer, and itinerant playboy.

In order to make the post mortem smear more effective, the permeance is going on under a battery of motion pictures, and with the aid of eight microphones. The public is not to miss one word or intimation of it.

Now there is doubtless something remarkably odd about the operations of Mr. Hughes' company. It seems to be established that on the occasion of the government contract, the company spent some \$169,000 in entertainment.

Elliott Roosevelt might have had some of it lavished on him. Indeed, on more than one occasion, the late president's family, or certain members of it, have not reflected credit on the Roosevelt name.

But to use all this in an attempt to discredit a great world statesman and a very great friend of Canada is a despicable political trick which will be resented by most Canadians.

## Mercy Killing

It is reported that a vast drive to legalize so-called "mercy killing" in the state of New York will get under way shortly. It is hoped by the euthanasia advocates that the lead of New York will be followed throughout the continent and that all North America, eventually, will subscribe to the principle of euthanasia.

Euthanasia, of course, is the scientific name for the legal killing of sick people who are adjudged by a committee of doctors or judges to be incurable.

The widely used arguments against euthanasia are ethical and religious ones. It is stated that the legalized killing of one who has committed no crime on the authority of a legally constituted board is too reminiscent of the totalitarian terror that individual lives belong to the state and are at the state's disposal.

Even if the patient himself consents to the lethal process, this argument is still valid because our law does not recognize the right of any individual to relinquish his own life.

But apart from the moral and religious considerations involved, the euthanasia proposal is still an enormity because science has made such tremendous strides in the war against disease that hardly any case of illness can be regarded today as hopeless. With the exception of cancer in its various forms, there is hardly a single disease for which cures have not been found or for which cures are almost in hand.

Allments of the heart and kidneys and lungs and stomach are responding to new treatments constantly. And research has made so many surprising discoveries that a cure cure for even cancer may be announced at any time.

At such a moment the zeal of the Nazi-minded proponents of euthanasia seems to be a trifle precipitate.

Certainly the majority of Canadians want no "mercy killing" in this country.

## Eva Goes on Tour

Senora Eva Duarte Peron, wife of the Argentine president, has been touring Europe in the grand style, encountered a setback in her triumphal parade when she reached Switzerland last year. In Bern, the populace heaved tomatoes at her. In Lucerne, she was the target for a shower of stones.

Switzerland, however, has apologized handsomely. And presumably the good senora's feelings are appeased.

It was, indeed, a shocking reception for one who has been fêted and admired in so many other places. In the Vatican, for instance, Senora Peron was received like a royal princess. In Spain, the king and queen gave her the highest honors. In France, she was the target for a shower of stones.

striking enthusiasm by the fascist administration of Spain that one might have thought she was some great totalitarian dignitary instead of the wife of an official who heads what is laughingly called a democracy.

It was very impolite of the Swiss to hurl tomatoes. And it is said that the indignity was promoted by the Communists.

One may, however, be permitted to doubt that.

Perhaps it was only the work of the blunt, plain Swiss who, like a good many people in this country, have also been sickened by this regal display on the part of a doubtless admirable lady who is still no more than the wife of a man who heads a presumed republic.

## Beauty Contests

The news columns announce the completion of a nation-wide beauty contest in Canada and name the winners in the five beauty regions of the country.

There is a prize beauty for the West Coast, another for the Prairies and still others for Ontario, Quebec and the Maritimes.

It is all very delightful and provides pulchritudinous pictures for the news-papers and magazines and for adolescent boys to hang up in their private quarters.

It is said, too, (how significant we do not know), that this emphasis on physical beauty tends to develop a more physically attractive race. Whether this result is to be attained according to the biological process favored by Jacob, or whether it merely encourages young men to pick more beautiful wives, it is impossible to say.

However, assuming for no good reason that this notion is true, many will be inclined to think that the result is attained, at too high a price.

Of what use is it, for instance, to develop a generation of more beautiful Canadians if the perusal of the pictures of beauty contestants leads individual Canadian husbands to be dissatisfied with the plain but excellent virtues of their own wives?

Of what use is it to raise the national standard of loveliness if the lives of thousands of young girls are to be ruined in the process—the losers through discontent and the winners through inordinate vanity?

The so-called "secret" papers of Abraham Lincoln, just opened for public use, are unlikely to provide any sensations as years ago they were used by Lincoln biographers.

An automobile left standing on the street, with doors unlocked or windows open, is an invitation to thieves. If in addition the key is left in the ignition the welcome sign is indeed out.

See One Answer  
To Communism  
EDMONTON, Ont., Aug. 8.—(CP)—One way the western world can answer the threat of Communism is to demonstrate it can avoid a depression over the next 20 or 25 years, Russ Munn said in an address to the Strathcona Rotary club yesterday.

"This more than anything else will give the lie to the Marxist concept that depressions are inevitable in capitalist states, particularly the one the Communists gleefully and hopelessly forecast for 1980," said Munn, just returned from his post as Canadian Press bureau representative in Moscow.

"The breaking of Communism or the defeat of a further advance in Western Europe depends also on the recovery of the continent. Financial help from the United States and Canada is absolutely necessary or else one country after another will be forced to turn to the Communists."

another, adding into an economic gutter, is going to be easy prey for the Communists."

"The western hemisphere itself would be the next major target by the same Kremlin-inspired tactics and the struggle would rapidly be brought to our own land."

**Lies Down But Won't Say Die**  
ITHACA, N.Y., Aug. 8.—(AP)—Either rats with seven toes are becoming common, or George has used up three of his nine lives.

Mr. and Mrs. C. J. Haxton, of Denver, George's owners, thought they lost their pet three weeks ago when a seven-toed cat, identified as George, was found dead on a highway. But George, once again, showed up.

The seven-toed Haxtons now positively identified the body of a cat on the highway as George. Once again, George turned up.

Twelve weeks later the Haxtons were cutting grass along the highway near their home, they came across the body of another seven-toed cat. Mournfully they buried it.

Waiting at the back door yesterday morning was George.

**Sees Decline of U.S. Within Next Century**

COLLEGE PARK, Md., Aug. 8.—(AP)—A grim forecast of a United States weakened by luxury and a declining birth rate overwhelmed within a century by reborn, Russian-dominated Europe and an industrialized Asia was published yesterday by the University of Maryland.

**Company in Move Employ Older Men**

First voluntary and concrete step toward giving Canada's older citizens an even chance when their juniors in the vital bid for employment, the new policy of the International Nickel Company of Canada—whose salaries are subject to a limit from 35 to 45 years of age—is being warmly praised.

The 450-page publication, which records in detail the CMA's 76th annual general meeting held this year in Banff, deals with the almost limitless opportunities Alberta offers the 6,000 members of resources awaiting only the development capital of new and decentralized industries from the larger manufacturing centres of Canada.

In the editorial, Industrial Canada cited an analysis of International Nickel's new policy taken from the *Sudbury Star*, edition of June 10, that "it was too old to be taken on payrolls of many large companies as a new employee, but not too old to work effectively. It was noted that certain large key industries require a high degree of skill from their main labour body with the result that large labour turnover is not desirable."

Industrial Canada quotes the *Sudbury Star* concluding paragraph thus: "It is with reluctance, therefore, that any industry alters policy in respect to age levels. International Nickel has now revised policy in this regard by increasing its starting age limit to 45 years of age, a move which is of course, on need of manpower. At the same time it unlocks opportunities for work to thousands of Canadian who would otherwise be barred from employment in the nickel industry. It is to be hoped the revision will prove satisfactory to all concerned."

The large and attractive financial publication devoted a large portion of its pages to Alberta, both in the past and in the future. The province who joined hands in making the CMA's largest gathering in a complete success.

Quoted at length are addresses by Premier Ernest Manning, Hon. A.J. Cooke, provincial secretary and minister of economic affairs, and W. D. King, deputy-minister of trade and industry, all of whom spoke at different meetings of the CMA's 1965 convention.

T. Ashenbrenner, general secretary of the CMA's Edmonton division, was in charge of arrangements for the Edmonton reception of the convention.

**Articles, Auto Reported Stolen**

Two car robes, a number of watches and two pairs of slippers were stolen Thursday from an auto owned by John Rakush, 3628 38 street, according to a police report. The owner stated the auto was parked in a lane near his home and the door had been forced open.

A 1960 sedan, bearing license number 22-479, owned by E. Baroni, 10548 Jasper avenue, was stolen from in front of his address between 2 and 3:30 p.m. Thursday.

**No Hard Feelings West Palm Beach**

WEST PALM BEACH, Aug. 8.—(AP)—Doris Beatrice Lammert, a woman from London to visit Aunt Bennett, but he is her brother-in-law now after a change-of-name in a ceremony when Doris arrived by steamship in Baltimore, Borden and his brother Julian met her at the pier. During the drive from Baltimore to Florida, Doris changed her mind in favor of Julian and he is now feeling between the brothers. Three days after Julian and his former fiancée were wed, Julian is married another else.

# Martell Faces Strong Field

## Two U.S. "Hot-Shots"

### Bid for Henry's Title

QUEBEC, Aug. 8.—(CP)—Main prizes of the U.S. Walker Cup team, Skeet Riegel of Upper Darby, Pa., and Frank Stranahan of Toledo, O., will lead the attack on defending champion Henry Martell's 1940 Canadian amateur title when more than 100 top-ranking Canadian and U.S. amateurs begin play in the 43rd Canadian amateur golf championship here Aug. 12-16.

Martell, defending titleholder from Edmonton, is shooting par golf at present with near-par victories in the Alberta amateur and Edmonton Open. The westerner will need his skill against a stiff-studied field which has marked him as the man to beat in the '47 competition.

Riegel, having a torrid start since his return from abroad in early summer following the Walker Cup conquest, gave indication that he is approaching championship condition with his conquest last week of the Rochester invitation tournament. The Ohio slammer, Frank Stranahan has boomed into No. 1 U.S. amateur status with a succession of sparkling tournaments since the Walker Cup games last spring.

Other U.S. players entered in the match-play tourney include Frank Rahn, prominent Detroit amateur, and Mortimer A. Reed of Rochester, runner-up to Riegel in the invitation last week.

CANADIAN golfers who threat in Martell are Ontario Amateur Champion Gary Harvath of Windsor and runner-up Jack Nash of

### Letthridge Leafs Sign Maltie Hughes

LETHBRIDGE, Aug. 8.—(CP)—Maltie Hughes, 25-year-old ex-professional golfer and last year's winner of the Western Canada Senior Hockey League, has signed a contract with Letthridge Maple Leafs of the Western Canada senior league. It was announced Thursday by Letthridge Maple Leafs manager (Beverly) Schriener, coach of the Leafs.

Other new players so far signed by the team include Ken Simpson and Billy Gibson, last year with Letthridge Maple Leafs, western Canada junior semi-finalists.

## Cards and Giants Gain On Stumbling Dodgers

NEW YORK, Aug. 8.—(AP)—The National League pennant race continued to tighten yesterday as the first place Brooklyn Dodgers dropped their sixth game in seven starts, the runner-up St. Louis Cardinals won their seventh straight, and the third place New York Giants won their sixth in seven games.

The fourth place Boston Braves also are in the running, following their three straight conquests of the Dodgers. Brooklyn now is four games ahead of St. Louis, and the St. Louis Cardinals are eight games ahead from the lead.

RED BARRETT, veteran Boston right-hander, was the latest hurler to stop the Dodgers as he limited them to three singles in regulation. The Braves got their only run in the first inning on a walk to Ed Stanky, a single by Gene Heffernan and Dave Walker. Heffernan hit a home run in the fifth and scored the winning runs in the sixth.

THE BROOKLYN DODGERS were shut out by the Cardinals in a walk-off game. The Cardinals won 1-0. The Dodgers' only run came in the third inning on a single by Ed Stanky and a home run by Gene Heffernan. The Cardinals' only run came in the seventh inning on a home run by Ed Stanky.

IN THE OTHER NATIONAL League game, the St. Louis Cardinals won 1-0 from the Brooklyn Dodgers. The Cardinals' only run came in the seventh inning on a home run by Ed Stanky. The Dodgers' only run came in the third inning on a single by Ed Stanky and a home run by Gene Heffernan.

# Our Town

By JACK SCOTT  
Right, Wrong Way

My wife and I have returned from a three-week "discovery" of the Alaska Highway and there's a right and wrong way for tourists of the future to enjoy the highway.

We know all about the wrong way. We had a wonderful time, but it cost us \$100 plus in appalling depreciation on the car we borrowed. When we shut the motor off in our garage we were exhausted from 23 days of almost continuous driving. That's the wrong way.

The right way to enjoy the trip—and it's one that should be a travel possibility for everybody in the next five years—is to take a leisurely camping tour either by trailer or tent.

Our trip had definite limitations for tourists who look for "resorts" or the attractions that go with established holiday areas. We discovered only three stop-overs with tourist appeal: the Dun Muir lodge at Marsh Lake in the Yukon, the settlement at a softball game, weiner roast, and

## Special Force Re-Union Planned

Re-union of the wartime Special Service Force members will be held at Helena, Montana, Aug. 13, 14, 15. It was learned today that the Special Service Force was composed of U. S. and Canadian soldiers who received special parachute training for service in any theatre of war.

Albertans who served with the force have been asked to attend the Montana reunion. Robert Smith, 1920 Livingston avenue, Helena, Montana, is in charge of the reunion.

Keith Melchior, 11425 30 street will be the attending Edmontonian. Other Northerners Albertans who belonged to the force are Ian Macrae, 960 110 avenue, Donald Cunningham, 9014 110 avenue, T. Fitzgerald, 10629 100 street, F. A. Kirk, 906 75 avenue, Jack Martin of Lacombe.

The number of Alberta representatives attending the reunion will depend on the co-operation of employers in releasing the former force members from work for about one week to that they may attend the convention.

**HOLD ANNUAL PICNIC**  
The annual Optimal Club picnic was held by members and their families along the North Saskatchewan River south of 142 street last night. The picnic was well attended and entertainment included a softball game, weiner roast, and

## Lions Club Members Are Taken For Ride

Shown above are two "arrestor" members of the visiting Lions Club party, with escorts, prior to being taken for a ride in the "black maria" which is parked directly behind them. The two "arrestors" were drivers for a sightseeing tour around the city and then escorted to the party by Walter Gordon, who was driving the "black maria". On the left, being helped by Const. Jack McIntyre, is Bruce Malcolm, Toronto. On the right are Stan Fowler, Timmins, Ont., and Const. George Mitchell, Toronto.

## Seek to Withdraw From Arbitration

Application has been made to the provincial department of trade and industry by the Edmonton Employees Federation, for permission to withdraw from the arbitration proceedings on behalf of four member city unions in the wage and working conditions dispute between the unions and the city.

It was intimated in the communication, that separate applications would be made by the unions involved for arbitration and conciliation boards.

W. D. King, deputy minister of trade and industry, intimated that the request of the Federation to withdraw from the proceedings had been granted, and a communication to the city commission was expressed the hope that a settlement would be arrived at between the city and the four unions without resort to further legal action.

Civic Union No. 32, representing clerical workers, recently accepted the compromise offer of a monthly increase of \$2 for monthly paid workers, and three cents an hour for those on hourly pay basis. The same offer has been made to members of the four unions seeking arbitration boards. They are asking for an increase of \$20 monthly to meet the increase in the cost of living.

An arbitration board has been granted to the Edmonton Transit System's workers, the members of which are Alex Souther, representing the city, L. Bell, representing union members, and Prof. Andrew Stewart, chairman, mutually agreed upon by the city and the union's representatives.

## For Transfusion Service 297 Quarts of Blood Donated to Red Cross

In three weeks of operation the Red Cross blood transfusion service in Edmonton has collected 297 quarts of blood from 425 donors during Friday by Miss E. T. Hagill, donor panel director for Alberta's blood transfusion service.

"WE COULD use many more donors in Edmonton," stated Miss Hagill, "but we expect that many citizens will join in support of the transfusion service at summer holidays come to an end."

TOTAL NUMBER of donors is expected to reach well over the 1,000 mark as the first month of operation of the transfusion service is completed this week.

Only three-fifths of a pint of blood per donor is taken, revealed Miss Hagill, less than wartime requirements.

Latest Edmontonian to benefit from the BPS is Joe Gagne, 11513 29 avenue, who has received five pints of blood since he was admitted to city hospital early in the week, injured at railway freight yards, Mr. Gagne was rushed to hospital where the BPS provided emergency transfusions.

Mobile clinics use three Red Cross trucks compared with one truck used in wartime, revealed Miss Hagill, because bedding and other equipment is now provided by the Red Cross.

Another reason for the enlarged portable units is that whole blood is now handled by the BPS where in war years serum was used. Whole blood necessitates more careful handling, portable refrigeration unit to preserve the blood, and a more highly-trained technical staff.

THE MOBILE TEAM visited Wednesday night and collected 115 donations. Although road conditions were bad, donors came from Rossington, Clyde, Fawcett, and Peaceville to support the BPS.

C. A. Roulet, Westlock Red Cross representative, and C. E. Kirby, of the Canadian Legion, were in charge of arrangements. Mrs. George Beach was in charge of the refreshments and recovery room voluntary team.

Last night's clinic in the YWCA yielded 123 donations.

Week ended, the mobile clinic will visit the following towns:

Wainwright, Aug. 11, 6:30 to 9:30 p.m. in the town hall, where Mrs. Gordon Graham will be in charge. Irma, Aug. 12, 10:30 a.m. to 12:30 p.m. in the school, with Mrs. Targett in charge. Viking, Aug. 13, 10:30 a.m. to 12:30 p.m. with The Rev. Father R. J. O'Neill handling arrangements in the church. Fort Saskatchewan, Aug. 13, 2:30 to 4 p.m. in the community hall.

## Returning From Convention City Lions Club Host To 85 East Members

The Edmonton Lions Club today is playing host to 85 Quebec and Ontario Lions and their families, who are on their way to Eastern Canada after having attended the International convention in San Francisco.

THE VISITORS arrived here early this morning over the CPR and were met at the station by members of the local club. Also on hand to greet them were members of the city police force, Constables George Mitchell and Jack McIntyre. They were accompanied by Bill Anderson, vice-president, Edmonton Lions.

THE ARM of the law was at the station for the purpose of "arresting" two members of the group. "Arrested" were Bruce Malcolm, district secretary for Ontario and Quebec, and Stan Fowler, immediate past president of the Lions Club Association.

The two were taken "into custody" and placed in the "black maria" and driven to headquarters.

Upon arriving at "headquarters" the two men found that they were the victims of a "major arrest" and headquarters lured out to the Macdonald hotel. They were introduced to Mayor Harry Ainlay as they stepped from the "black maria" and were presented with keys to the city by the Mayor.

MR. MALCOLM, who is unaccustomed to riding in any kind of police vehicle, did not take kindly to the alphonso.

The vehicle was forced to stop to provide a bit of fresh air for him. Mrs. Malcolm when asked what she had thought of the hoax replied, "I didn't know what it was, but Stan said they were very serious about the whole thing. I didn't want to find out what it was all about."

Both gentlemen, at the conclusion of their ride when they were taken to the hotel, laughed at the joke, and commented on the very ingenious of the club to think it up. Mr. Derrington was very courteous in his treatment of a police inspector.

THE GROUP had breakfast at the hotel, and were officially welcomed to the city by Mayor Ainlay. The welcome was answered by Mr. Fowler who stated, "I think the Edmonton club had a very entertaining reception and I am sure the rest of the day will be very enjoyable. I have seen of it—the inside of a police car."

Upon the completion of breakfast, the group boarded city buses and were taken on a tour of the city. They lauded the city as a beautiful city, a product of the local club.

Many of the members took advantage of the opportunity to take Gordon Smith, to the Mayfair golf course to play a round before lunch.

THIS AFTERNOON the group

## Half Inch Rain At White Court

Thunder and hailstorms were prevalent in the White Court district last night with high winds. Total rainfall amounted to one-half inch.

In the Edmonton area, skies will be overcast today and Saturday. Interim rain is expected tomorrow afternoon with cool weather prevailing throughout the day. Winds were southwest at 13 miles per hour at noon today and are expected to shift to northwest at 20 miles per hour early Saturday.

The maximum temperature yesterday registered 71 above at 3 p.m. and the overnight low read 54 at 6 a.m. Estimated low temperature tonight is 53 above. Expected high Saturday is 60 above.

## Two Farm Groups To Discuss Merger

United Farmers of Alberta and the Alberta Farmers' Union will continue talks on negotiating a merger of the two farm bodies Monday when contact sessions from each will resume discussions in Edmonton.

Personnel of the committees carrying out the talks and preparing a brief on the subject for consideration at their next conventions are: St. Catharines, Mr. and Mrs. Henry Young, vice president, and Ray Garsneau, executive member. UFA, George E. Church, president, Eudolph Henrich, director, and Mrs. M. E. Lowe, district officer, and UFA president of the UFA.

## Two U.S. Police Held For Theft

TACOMA, Wash., Aug. 8.—(AP)—Two Tacoma policemen arrested yesterday for the theft of \$46,500 from the rear of a wrecked automobile said they "weren't sure if it wasn't counterfeit" or they "might have turned it in."

The pair, Ernest Hyatt, 29, and Richard Fiesberg, 26, were formally charged with grand larceny and held under \$10,000 bail. Prosecutor Patrick Steele and other officials said both men had confessed.

Police Chief William Farrar

stated that they had divided the money early Wednesday after finding it in the trunk compartment of Mike Kotler's automobile.

Kotler, a Clig Harbor rancher, had driven into a guard rail at a Tacoma intersection Wednesday and was taken to hospital for treatment.

Police officials knew nothing of the missing money until a brother of the rancher reported it had been in the car and could not be found.

The pair, Ernest Hyatt, 29, and Richard Fiesberg, 26, were formally charged with grand larceny and held under \$10,000 bail. Prosecutor Patrick Steele and other officials said both men had confessed.

## Hold Key in Investigation

Press agent for the Howard Hughes Aircraft Corporation, John Meyer, is shown at the El Morocco in New York with Linda Darvett, his testimony about the Corporation's costly Hollywood parties is one of the key points in the current investigation into the Hughes firm.

He asked that a license by-law be passed which would carry a provision providing for a bond guaranteeing satisfactory performance of work undertaken, and also would provide for the establishment of an examining board to pass on the qualifications of those applying for a painter's license.

IF CITY COUNCIL approves of the recommendation of the by-laws committee, it will be the first time in the city's history that a bond has been required for faithful performance of contracts through general legislative action.

Mr. Blanchett told the committee that members of the painters union in Edmonton were supporting the proposed action.

The committee also dealt with a proposed by-law to provide off-street loading in the wholesale district, and instructed the city commissioners to confer with representatives of wholesale houses, transportation executives, and the city's departmental superintendents in an effort to reach a solution of this problem.

S. Bruce Smith, K.C., appearing on behalf of 20 wholesalers and business operators, registered opposition to the by-law as it would affect existing buildings in the wholesale district.

HE PRESENTED a petition from his clients in which it was pointed out that it would be unfair to apply the off-street loading by-law to existing buildings.

He said these structures had been erected in conformity with existing building and other civic regulations, and had been operated since their construction under those regulations and should not now be interfered with in a recognized wholesale area.

Mr. Smith said that to interfere with them now would impose tremendous expense to the firms involved.

The present loading facilities, he added, are of the same type as those in wholesale sections in most other cities, and submitted that the rights and privileges enjoyed for many years should continue to be respected.

German Red Party "Least Effective"

BERLIN, Aug. 8.—(AP)—The German Communist party has "proved the least effective" of the major political parties where it has faced a fair election without support of the Russian occupying power, says an official analysis by the American Military Government.

In the three western zones—occupied by the United States, Britain and France—and containing approximately 70 per cent of Germany's population—the Communists could scrape up more than 10 per cent of the vote only in the larger industrial cities.

Even in quadruplate-occupied Berlin, where the Communists operate on the ticket as a dominant portion of the Socialist Unity party, they suffered a severe doubling from the Independent Social Democrats in the city's first post-war election last Oct. 20.

Only in the Russian occupation zone—where the Social Democrats were outlawed and the Socialist Unity party had special powers—a "government party"—could the Communists achieve a position.

The German Democrats, one of

## Would Protect Public

Designed to protect the general public against incompetent workmen the by-laws committee of city council, in recommending that a by-law be enacted which will provide for the licensing of both master and journeyman painters, and also for the posting of a \$1,000 bond by master painters for the faithful performance of their contracts.

operating in the city, and were contracting for paint jobs. They were doing indoor work and many householders had been victimized.

He asked that a license by-law be passed which would carry a provision providing for a bond guaranteeing satisfactory performance of work undertaken, and also would provide for the establishment of an examining board to pass on the qualifications of those applying for a painter's license.

IF CITY COUNCIL approves of the recommendation of the by-laws committee, it will be the first time in the city's history that a bond has been required for faithful performance of contracts through general legislative action.

## U.S. Dollar Supply Worry for Canada

By D'Arcy O'Donnell

OTTAWA, Aug. 8.—(CP)—A high government official indicated yesterday that the future source of badly-needed American dollars was one of the major worries arising for Canada out of Britain's austerity program.

BRITAIN HAS BEEN making American dollars available to help Canada offset the adverse trade balance with the United States but that assistance is expected to end when the \$2,700,000 American loan to the United Kingdom is exhausted in October.

High Dalton, chancellor of the exchequer, disclosed that the United Kingdom had agreed to pay 50 per cent of her Canadian purchases out of the United States loan as a measure to help the Dominion meet its shortage of United States dollars last year the payments totalled \$200,000,000.

The amount the United Kingdom pays Canada each month in American funds is a closely-guarded secret, but there have been indications from official sources that the payments have been greater than last year, possibly because of heavier drawings on the American loan.

CANADA'S ADVERSE trade balance with the United States last year amounted to \$603,000,000 and present estimates are that the 1947 figures will reach \$800,000,000.

Despite assistance from the United Kingdom last year Canada had to dip into her American dollar loan to the tune of \$23,000,000. A larger dip may have to be made this year. The reserves totalled \$124,900,000 on Jan. 1.

Although he admitted the situation was reaching a "critical stage,"

the recommendation of the by-laws committee of city council, in recommending that a by-law be enacted which will provide for the licensing of both master and journeyman painters, and also for the posting of a \$1,000 bond by master painters for the faithful performance of their contracts.

German Red Party "Least Effective"

BERLIN, Aug. 8.—(AP)—The German Communist party has "proved the least effective" of the major political parties where it has faced a fair election without support of the Russian occupying power, says an official analysis by the American Military Government.

In the three western zones—occupied by the United States, Britain and France—and containing approximately 70 per cent of Germany's population—the Communists could scrape up more than 10 per cent of the vote only in the larger industrial cities.

Even in quadruplate-occupied Berlin, where the Communists operate on the ticket as a dominant portion of the Socialist Unity party, they suffered a severe doubling from the Independent Social Democrats in the city's first post-war election last Oct. 20.

Only in the Russian occupation zone—where the Social Democrats were outlawed and the Socialist Unity party had special powers—a "government party"—could the Communists achieve a position.

## U.S. Dollar Supply Worry for Canada

By D'Arcy O'Donnell

OTTAWA, Aug. 8.—(CP)—A high government official indicated yesterday that the future source of badly-needed American dollars was one of the major worries arising for Canada out of Britain's austerity program.

BRITAIN HAS BEEN making American dollars available to help Canada offset the adverse trade balance with the United States but that assistance is expected to end when the \$2,700,000 American loan to the United Kingdom is exhausted in October.

High Dalton, chancellor of the exchequer, disclosed that the United Kingdom had agreed to pay 50 per cent of her Canadian purchases out of the United States loan as a measure to help the Dominion meet its shortage of United States dollars last year the payments totalled \$200,000,000.

The amount the United Kingdom pays Canada each month in American funds is a closely-guarded secret, but there have been indications from official sources that the payments have been greater than last year, possibly because of heavier drawings on the American loan.

CANADA'S ADVERSE trade balance with the United States last year amounted to \$603,000,000 and present estimates are that the 1947 figures will reach \$800,000,000.

Despite assistance from the United Kingdom last year Canada had to dip into her American dollar loan to the tune of \$23,000,000. A larger dip may have to be made this year. The reserves totalled \$124,900,000 on Jan. 1.

Although he admitted the situation was reaching a "critical stage,"

the recommendation of the by-laws committee of city council, in recommending that a by-law be enacted which will provide for the licensing of both master and journeyman painters, and also for the posting of a \$1,000 bond by master painters for the faithful performance of their contracts.

operating in the city, and were contracting for paint jobs. They were doing indoor work and many householders had been victimized.

He asked that a license by-law be passed which would carry a provision providing for a bond guaranteeing satisfactory performance of work undertaken, and also would provide for the establishment of an examining board to pass on the qualifications of those applying for a painter's license.

IF CITY COUNCIL approves of the recommendation of the by-laws committee, it will be the first time in the city's history that a bond has been required for faithful performance of contracts through general legislative action.

Mr. Blanchett told the committee that members of the painters union in Edmonton were supporting the proposed action.

The committee also dealt with a proposed by-law to provide off-street loading in the wholesale district, and instructed the city commissioners to confer with representatives of wholesale houses, transportation executives, and the city's departmental superintendents in an effort to reach a solution of this problem.

S. Bruce Smith, K.C., appearing on behalf of 20 wholesalers and business operators, registered opposition to the by-law as it would affect existing buildings in the wholesale district.

HE PRESENTED a petition from his clients in which it was pointed out that it would be unfair to apply the off-street loading by-law to existing buildings.

He said these structures had been erected in conformity with existing building and other civic regulations, and had been operated since their construction under those regulations and should not now be interfered with in a recognized wholesale area.

Mr. Smith said that to interfere with them now would impose tremendous expense to the firms involved.

The present loading facilities, he added, are of the same type as those in wholesale sections in most other cities, and submitted that the rights and privileges enjoyed for many years should continue to be respected.

German Red Party "Least Effective"

BERLIN, Aug. 8.—(AP)—The German Communist party has "proved the least effective" of the major political parties where it has faced a fair election without support of the Russian occupying power, says an official analysis by the American Military Government.

# Special Products Hit

## British Import Ban Blow to Canadians

By Chester Bloom

OTTAWA, Ont., Aug. 8.—Canadian producers of some specialized food products such as canned salmon, apples, cod fillets and the like probably will be hard hit by the new British import cuts, it was learned here yesterday from the department of trade and commerce.

LUXURY PRODUCTS such as furs also will be hit. Manufacturers of small articles, the specialty textiles, typewriters, dolls and toys are due for restriction of their British market, as was Prime Minister Atlee's speech to the British Commons can be interpreted.

These items in the aggregate make a great deal to Canadian producers completely out of the big food contracts such as wheat, barley, beans, pork, corn, etc., which are not expected to be reduced except by negotiation, and then very little.

A British trade mission is en route to Canada about the C.I.W. Importers of Canada but not yet arrived.

HOW SERIOUS the curtailment of small manufactured articles, food specialties and luxury goods may be to Canadian producers, however, is disclosed by a few figures from Canadian 1945 annual exports to Britain:

Canned salmon, \$1,742,000; pickled salmon, \$540,000; apples, \$1,000,000; cod fillets, \$1,000,000; textiles, \$1,000,000; toys, \$1,000,000; dolls, \$1,000,000; furs, \$1,000,000; rubber boots and shoes, \$1,000,000.

CANADIAN TOBACCO is not under government control and so subject to severe cuts. 1946 exports to Britain were, flour, \$4,000,000.

Other items of Canadian exports which may be seriously curtailed by the new British import cuts include leather and shoes and most others which totalled \$2,000,000 in 1945.

Typewriters, portable \$74,462; typewriter, standard \$2,435; fountain pens and stands, \$103,214; pens, \$12,383; toys, \$17,771; dolls, \$1,000,000; furs, \$1,000,000; rubber boots and shoes, \$1,000,000.

The foregoing are merely illustrations of hundreds of exports of small manufactured articles for which some Canadian manufacturers have been trying to build up a market in Britain. The trade and commerce department has endeavored, astoundingly during the last two years to get the British to relax import restrictions on such articles with considerable success, at least, the British agreed to relax the ban on certain amounts as "quota" for future trade.

SO FAR AS MOST food products are concerned, even such big items as canned salmon, Canadian exports are not expected to be materially threatened as the big United States market can absorb nearly all our surpluses except wheat.

But it is a different story with the specialty goods and small manufactured articles which cannot find a U.S. outlet over their tariffs. The U.S. market also can no doubt absorb whatever cuts are made in wood and lumber exports to Britain. Recently, Canada was compelled to reduce the quota of

# POLICE COURT

## Too Little Sleep Causes Accidents

It was a case of a tank truck, a long haul, little sleep, and a subsequent accident from carelessness. Leonard Smith, 34-year-old driver for a Calgary firm, left Calgary July 21, hauled his cargo to Vegreville on a non-stop trip, arriving in that town Aug. 1, and started back for the southern city after about a one-hour sleep.

On his return journey, he found at the wheel, averted to the wrong side of the road and crashed into another truck. He pleaded guilty to a charge of dangerous driving in RCMP traffic court Thursday afternoon, and received a fine of \$25 or 30 days from Magistrate Harold Hays.

Upon questioning by the judge, Smith revealed that he had had but four hours sleep during his trip, taken in snatches on the road. He was reminded that such working conditions were contrary to the hours of work act, which states that only nine hours may be spent on duty at any one time.

GEORGE LENNY, the cab driver involved in a recent three-way accident which resulted in the death of a gasoline truck driver by burning, was fined \$50 or two months and his driver's license suspended for three months.

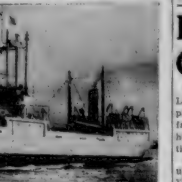

It was revealed in court that the accused was returning to work when near Nisku he failed to stop, ran over a car, and then, after the other driver clipping the rear, he parked, still in the ditch. The other, then went into the ditch. His vehicle began to burn but the fire was quickly extinguished.

There was no evidence that the truck was under the influence of alcohol at the time of the accident.

It was while the passengers of the stopped car were rushing to his vehicle some 300 feet distant to assist him, that the gasoline truck struck the parked car, rolled over, and burst into flames.

Virgil Goulin, on Aug. 2, failed to

# To Rush Supplies to North Posts

The S.S. North Pioneer which has been chartered from the Clarke Steamship Company Limited to rush supplies to the north posts on the itinerary of the ill-fated Nasopie. The vessel will sail from Montreal about August 15 with general cargo including 400 tons of fuel oil which will include Dunlop tires on DeSoto Island, Arctic Bay on Admiralty Island, Clyde, Pond Inlet and Pangnirtung, all on Baffin Island.

report an accident involving his auto until police investigated. He was fined \$5 or seven days.

Checked on the St. Albert Trail by RCMP recently, Dave Morris, Edmonton, had no driver's license, no liquor permit, but had liquor in his car. He was fined \$25 or costs or three days in jail on the first charge, and \$25 or costs or 30 days on his liquor charge because it was his first offense.

Peter Glaschinski's charge under the Public Service Vehicle Act was waived for hearing in Vegreville. Morris Cameron was fined \$5 and costs when his disorganized driver's license was amended to cover under the jurisdiction of the Vehicle and Highway Traffic Act. John Loeber pleaded guilty to a charge of driving an auto without turn lights and was fined \$2 or three days, and Donald M. Smith, who claimed his headlights and tail lights went out while driving from Nisku Lake to Edmonton, was fined \$5 or seven days on a first offense.

# Little Rain, Heat Cause

## Further Deterioration Of Crops Reported

WINNIPEG, Man., Aug. 8.—Little rain was received during the past week on the prairies and the heat, coupled with the extreme heat, caused a further deterioration of crops prospects.

In Manitoba, crops are standing up well and at least an average yield of wheat should be harvested. In Saskatchewan, the eastern part of the province is in fair shape and may have a nearly average crop. In the western and southern parts, however, conditions are very poor and estimates of yield range from zero to ten bushels per acre.

CONDITIONS are variable in Alberta but are good only north and west of Edmonton and in the Peace River area. Harvesting should be fairly general by the end of next week in all areas. Hay is about completed with a good crop in most areas, according to the weekly crop report of the department of agriculture of the Canadian National Railways.

A few scattered showers have been received in east-central Alberta but these have not offset the effects of the hot weather and the crops have deteriorated badly. The time of sowing has been delayed very much in some districts. Cutting has started at a few points but will not be general for a week. Some conditions are being met for feed crops. Good crop has been harvested in most districts. There appears to

be sufficient labor available for the harvest.

THE AREA EAST of Edmonton has suffered another blistering week, with no rain and the extreme heat, coupled with the extreme heat, caused a further deterioration of crops prospects.

North and west of Edmonton good rains were received and all areas are making excellent progress. Wheat is filling well and oats are making good progress. Average crop. There appears to be sufficient labor for harvest. The day crop is good even in the Peace River area and the feed situation is good.

WEATHER in the Okanagan valley has been warm and dry during the week. Peaches and Bartlett pears are moving freely, the systems are practically finished and reached their estimated quality.

LESS FARM AREA

OTTAWA, (CP)—Area of occupied farm land in Saskatchewan in 1945 was 3,000,000 acres, showing a decrease of 0.8 per cent from 1941 but an increase of 44 per cent in the earlier period since 1940, the bureau of statistics reports.

**Name M. M. Downey Appointment Justice Probe Jap Claims**  
OTTAWA, Aug. 8.—(CP)—Deputy Justice Minister M. M. Downey was reached yesterday at a meeting of representatives of the various Grand Chapters of Royal Arch Masons across Canada which received a series of practical papers dealing with the activities and program of the order. Officers were elected and plans were made for the 1948 gathering which will be a cooperative effort designed to promote and ensure mutual understanding among the eight Canadian Grand

**Eight Businessmen Will Go to Japan**  
OTTAWA, Aug. 8.—(CP)—Eight Canadian business men have been given permission to go to Japan to establish private trade connections disrupted by the war. In line with Canadian efforts to reestablish trade with that country, a trade department official said last night. Names of the eight were not disclosed, though he believed four were from Vancouver. He could not say when they would be leaving for Japan or if they would be travelling in a group. A considerable number of applications from Canadian business men to go to Japan had been received, but only eight could be given per-

**The Book of Knowledge**  
(Department: Plant Life)  
This and the following articles are taken from the Book of Knowledge and can be clipped for saving in a reference book.  
**HOW MEN HAVE IMPROVED WHEAT**  
There is hardly a flower, shrub, vegetable, fruit or grain upon which men have not experimented. One of the most important is wheat. There are now something like three hundred varieties of wheat, though probably some of these are alike. Both in the United States and Canada, much have been breeding wheats for a long time. Perhaps the most romantic story is that of the Saunders family in Canada. Doctor William Saunders began crossing wheats in 1866. What he brought was a wheat which would yield well, have good gluten, and

**Canadians Continue Snap Up New Autos**  
OTTAWA, Aug. 8.—(CP)—In 1947 Canadians continuing to gobble up new cars at a rate as they appear on the market, figures released yesterday by the bureau of statistics show. During the first half of the year, more than twice as many new motor vehicles were sold than in the same period last year, 101,619 units retelling for

**Effect of varying amounts of light on tomato plants.** Plant at right was grown under natural light. The one at extreme left had artificial light of only 1 hour. The third plant had about 4 hours of light. The fourth had 7, 11 and 17 hours respectively.  
Also important in fruits, and in many of our garden vegetables, several varieties of tomatoes, for example, which yield large crops of silken, fleshy fruits, are no longer grown because they are subject to disease. Occasionally a plant disease becomes so common in a locality that the growers are in danger of ruin. Here the plant breeder may make new varieties which resist the disease.  
Many men have worked on corn. Some have been chiefly interested in yield others in uniformity of ears. Some varieties have been developed which are ready for use as early as 70 days from the time the seed is planted; others stand cold weather better than varieties known before.

## Our Town

(Continued from Page 6)

Burwash Landing on Klondike Lake north of Whitehorse and a lodge now being constructed at Teslin Lake, just inside the Yukon border.

The rest of the stopovers are purely utilitarian. They're comfortable and clean, but they're designed only for over-night accommodations.

If we are going to do it again we'd take a trailer or complete camping equipment and our own provisions. Most important of all we'd take our time.

**Some Answers**  
Before my wife and I left we made out a series of questions that we hoped to answer at typical tourist. Here are those questions and the answers we found:

**Will the highway be open for tourists in 1948?**  
There'll still be some restrictions but 1948 will probably be the highway's first year as a place of travel-land. There won't be enough facilities to take off all restrictions. In our opinion, that situation may continue for five years.

**Is it possible for the average tourist to drive to Fairbanks and back?**  
Possible, yes, but enjoyable only with five or six weeks of free time. For the family with two weeks' vacation the Alaska highway is out of the question.

**What's the best way getting to Dawson Creek, B.C., "Mile Zero" of the highway?**  
At present there's only one way: via Edmonton and then south along the Alberta provincial highway that skirts Lester Slave Lake. That, as it's reported, is a long and difficult route, but Alberta officials say the road will be in good shape by next year. The Hart Highway, which links Prince George, B.C., with Dawson Creek, may also be ready next year. By the way, it's about 1800 miles from the U.S.-Canada border to

## I Saw Today

A. G. KIRSTINE, past president of the Edmonton Lions Club, making preparations for the dinner for 83 visiting Lions, here on Friday.

AND  
Cy Bush and George McCall, Lion Club members, looking forward to the full day's activities with the visitors. Gordon McCann, telling a friend that the wedding bells soon will be ringing for him. George Nickelson, walking north on 35th street to a trolley bus stop. George Truett, busy at work in the CPB building.

The Alaska Highway's beginning. Can I take a new car up the highway? We did and regretted it. A jeep or truck will take less punishment.

What is there along the highway that makes the trip worthwhile? Fresh-baking scenery, hunting, fishing and camping.

What are the drawbacks? Immense distances to travel, high prices for gas, groceries and accommodation, a gravel road that's hard on cars and particularly hard on tires, a scarcity of mechanics.

When can I make the trip? Any time from June to September. Best for tourists, but you'll have a heavy load in midsummer to get the best road conditions.

## CMA Submits Brief

## Want Workers to Pay Compensation Levies

Industrial workers should make contributions to the funds of the Workmen's Compensation Board, according to a brief prepared by the Canadian Manufacturers' Association for presentation by A. J. Maure, chairman of the association's legislative committee, Friday morning to the committee selected at the last session of the Legislature to study revision of the Workmen's Compensation Act.

MR. MAURE drew attention to unemployment insurance and job-replacement schemes and gave examples of satisfactory application of the contributory system. "Benefits make it their business to see that funds are not properly depleted by carelessness or by malfeasance," he added.

If compensation rates were computed on a higher basis than the present 60.3 per cent, as advocated in some quarters, it would mean encouragement to malfeasance and would increase the overall cost to industry.

Arguments that under the present system the manufacturer or industrialist does not pay the cost were answered with the contention that the increase in costs was assured to a trolley bus stop. George Truett, busy at work in the CPB building.

The highway itself is open throughout the year. How do I go about making plans for such a trip? You can't this year. Next year you should apply to the Assistant Commissioner, Royal Canadian Mounted Police, Edmonton. He'll inform you of the extra equipment required to make your car "road-worthy."

It that extra equipment enough? Yes, but you'd be advised to take four or five spare tires and an extra wheel — and a supply of mosquito netting.

Just climbing should I wear? Just what you'd wear going on your backwoods motor trip, but you'll have a heavy load in midsummer to get the best road conditions.

What is there along the highway that makes the trip worthwhile? Fresh-baking scenery, hunting, fishing and camping.

What are the drawbacks? Immense distances to travel, high prices for gas, groceries and accommodation, a gravel road that's hard on cars and particularly hard on tires, a scarcity of mechanics.

When can I make the trip? Any time from June to September. Best for tourists, but you'll have a heavy load in midsummer to get the best road conditions.

What is there along the highway that makes the trip worthwhile? Fresh-baking scenery, hunting, fishing and camping.

## Letter after letter reads:

"The Finest  
Pontiac yet"

A Product of General Motors

SOMETHING TO TALK ABOUT — the 1947 Pontiac! And judging from the hundreds of letters we receive, it's something to write about too — especially if you're a pleased-as-punch Pontiac owner. Those who have driven Pontiac for years . . . and they are legion . . . tell us what their experience has told them . . . that the 1947 Pontiac is truly the finest of the famous Silver Streaks. Those who have never driven Pontiac before, express the jubilant, unqualified delight of people who have at last found what they have long sought — plus value in the low-price field.

To us, these letters are a constant source of satisfaction. The pride of ownership revealed in every word is only equalled by our pride in producing the 1947 Pontiac — a fine car made finer.

The stack of orders piled up for the new Pontiacs are gratifying testimonials to the quality and beauty of this finest of the famous Silver Streaks. Unfortunately, so many orders also tell us that many who wish to drive Pontiac must wait. So, your car will be yours when you want it. Your present car will give you better, safer service while you wait if you have it serviced by your Pontiac dealer.

**PONTIAC**  
A fine car made finer

"I own and operate a taxi business and many years experience have taught me that Pontiac is the best car in the world. The new Pontiac is a great improvement on the old one. It's a real winner." — Ralph L. Harding, Vancouver, B.C.

"I have always driven a large car, but I have found my Pontiac outstanding as far as riding qualities are concerned. One point which especially impresses me is the way it takes the curves even at high speeds." — E. Broken, Kelowna, Ontario.

"I was 21 months to get my new Pontiac. I'm certainly glad I did. To the use of handling and economy of operation I just can't say the best." — John Ross, Port Arthur, Ontario.

"As a motor mechanic familiar with all cars, Pontiac is powerful but quiet. I have none of my choice." — A. Brown, Regina, Saskatchewan.

"I have found my Pontiac outstanding as far as riding qualities are concerned. One point which especially impresses me is the way it takes the curves even at high speeds." — E. Broken, Kelowna, Ontario.

"I was 21 months to get my new Pontiac. I'm certainly glad I did. To the use of handling and economy of operation I just can't say the best." — John Ross, Port Arthur, Ontario.

# Today's Markets

## Today's Market Summary

**NEW YORK**—Stocks registered a slow retreat. Selling on an accumulation basis of new issues predominated.

**TORONTO**—Trading was highly selective, industrials eased generally and western oils gave way mildly.

**CALGARY**—Most oil stocks traded at losses of one to five points. Leduc was the only gainer.

**Friday's Dow-Jones Averages**

|      | Industrial | Stocks | Utilities |
|------|------------|--------|-----------|
| 1947 | 110.00     | 101.00 | 101.00    |
